

Sudoku Race

A classic revisited..

A Project By: Eduardo Trabattoni, Alberto Sardo, Luca Beltrami, Valentino Belotcaci, Kirustika Mohanathas, Philip Krause, Hoormazd Pirayeshfar

Our Idea:

Create a complete game experience where people of every age can join a virtual room to solve the same sudoku while choosing the difficulty level to see other players advancement based on their scores and errors.

Mockups:

Sudoku, Together.

Race against your friends. Do it for glory.

Find Game

Create Game

Let's create a game

Configure your settings, click **Create** and play with friends.

How **difficult** do you want to go?

Easy

Medium

Hard

What do want this game's **visibility** to be?
(You can change this later)

Private

Create

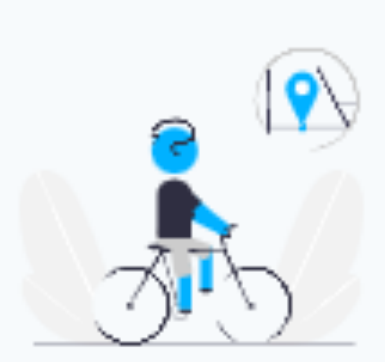

Mockups:

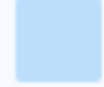

Let's play a game

You're all set to join **OVUJ**.
This game is rated **easy**.
The game hasn't started yet. What should we call you?

Set

 **edu**

Hang tight! You'll be racing the clock to fill some blocks in no time! This game is rated **easy**.

Looks like you're the first one here.

Mockups:

Our work so far:

Single Player

- **HTML&CSS Design**
- **Game Logic**
- **Server**
- **Routing**
- **Database**

Our Goals:

- **Complete single player game logic**
- **Finishing and testing the database model**
- **Implementing multiplayer game experience**
- **Final testing and presentation**
- **Extra Feature: in Game Chat**

**Thank you and see you at the next
milestone!**
